

Deharde

Technology-Provider

Full service: Our expertise includes the entire value added chain

> 300 employees

Turnover 2020: 36,5 Mio €

Areas of Expertise

Design und development, programming

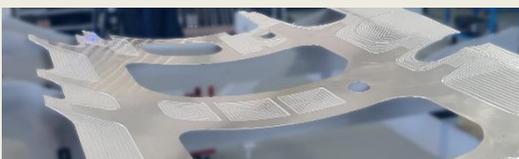

Milling and turning, welding

Grinding, painting, surface treatment

Precision engineering, metrology services

Assembly and logistics

Our Product Range

Aerospace

Design & Build for structural elements, system supplier, spare parts to airlines, maintenance, retrofit, prototypes and flight test equipment, prefabrication

Plant Engineering

Production planning and design, equipment, mechanical engineering, fibre composite tools, automation, production customization, metrology services

Automotive

Engine and vehicle components, aerostructures, space flight components, assembly of modules, racing components, machine components

Wind Tunnel Models

Different models for wind tunnel testing: aerostructures, planes, space missiles, automobiles, racing- and rail vehicles, wind energy plants and test rigs.

Deharde Polygon Forming

Sheet metal forming to curved, twisted and conic skins, different metals usable, short run-time, less manufacturing complexity, no rework, conform to REACH

We stand for

- ✓ Absolute customer orientation: great flexibility and individual solutions
- ✓ Highly qualified staff & state of the art machinery
- ✓ Profound know-how basing on the experiences of a more than 100 years old company.
- ✓ Certified workmanship: ISO 9001-2015, EN 9100-2018, EN 1090-2-2018-EXC3 etc.
- ✓ Global availability of products and services
- ✓ Delivery of big components possible due to direct harbour access
